## **Are You Ready to Clean Up the Neighbourhood?** (Target)

Generation Plus is here with a new facility to help Melonville grow a better tomorrow.

Since 1987, Generation Plus Biochemical Corporation has been a trusted name in environmental management, winning awards for their top tier recycling and environmental care techniques and ideas. Their new facility in Melonville holds no exception. This new facility will take wastewater from local treatment facilities and convert it into bio-solids that will be used as fertilizers to grow a better tomorrow.

With your help, Melonville, we can make this the best place to live. Help us welcome the new facility home. (**Image Building/Public Service**)
